

DOCUMENTS & AESTHETICS

- Add logout feature to the 'Profile' section
- Add name assigned to the document (not only Document + date)
- Add possibility to change the case priority and status (urgent/medium/low priority - started/in progress/done/)
- For Document analysis : add the possibility to assign tags to the case/document so that it can be identified and sorted out easier
- Enable expansion of the document tab which gives more details (like document layout, creation date, etc. - i'll send you the screenshot to clarify)
- Add the logo I've sent + apply the colorway I've shared, make the UI more accessible and clear (rounded edges, add icons from open source library like bootstrap/fontawesome), im adding the screenshot layout to be applied

CHATBOT:

- Simplify and make the response layout more clear
- Make the chat head only for the user: make the AI agent to respond on the clear background (like Chat GPT)
- Adjust the text formatting to be displayable (bolding, italics, spaces, etc.)
- Involve document regeneration in case of additional instructions provided and adjustments
- Debug/enable document upload and analysis
- Debug the document creation for every response
- Debug the document turning into chat if not downloaded
- Add the document appear in the Documents/Cases subsection while the document is created only, whenever it is being updated - do not create a new separate document
- Add two personas for the AI agent to be switched - one for commercial law and one for personal law
